

October 2017

Welcome to the updated Sharpening the Sword website.

As you tour around the website, you will notice that the pop-up feature is being used extensively. This feature allows more modules to be available more efficiently within the space confines of the web page.

Once you have selected a module for your e-Sword, RUN the setup wizard by clicking through each screen until you click FINISH. Your module will be installed in directories as follows:

TOPIC NOTES, STUDY NOTES, MEMORY VERSE MODULES will be stored in your Documents / e-Sword folder.

BIBLES, COMMENTARIES, DICTIONARIES, REFERENCE, GRAPHICS, DEVOTIONAL MODULES will be stored in your C: / Program Files (x86) / e-Sword folder.

If you store your e-Sword modules in any other locations (such as MEGA, or DROPBOX, or other folders on your computer) you will need to move the newly downloaded modules as described above to those folders.

NOTE: If you use the BibleSupport module installer, your modules may be downloaded to other directories.

If you are not seeing newly downloaded modules in your e-Sword check for them in the directories noted in the box above, then make sure your directories match the pathway within your e-Sword so e-Sword can find them as follows:

Open e-Sword / OPTIONS / RESOURCE

The bottom line is—KNOW WHERE YOUR MODULES ARE!

Don't hesitate to contact me if you have any questions about your e-Sword.

God bless you as you study His Word and grow in the knowledge of our wonderful Savior Jesus.

Regards,

Shirley Babienco
